

# The Ænigmatic Addenda:

## Guest Constructors revisit the Adalogical Ænigmas

No. 4: Ms Gaby Weidling revisits Ænigma #4

Pavel's Puzzles

High-quality mechanical and logic puzzles, direct from the designer!

<http://www.pavelspuzzles.com>

Gentle solver,

Ms Gaby Weidling is a virtual *polymath* of puzzles who already, at a relatively tender age, has a most impressive *curriculum vitae*. Among many other accomplishments, she co-developed *The Maze of Games*, the world's first and only interactive puzzle novel, and now directs puzzles and events for the fine firm of Epic Team Adventures ([www.epicteamadventures.com](http://www.epicteamadventures.com)).

Whilst my Ænigma #4 was inspired by romantic love, Ms Weidling's *Addendum* gains its heart from a *different* love, one that we share, that of our treasured feline companions, our *cats*.

Your task is to fit all of the famed cat names below (*sans* spaces) into the grid. Each entry begins in the correspondingly numbered square, moving thence *initially* in the direction shown. Each succeeding letter may follow in *any* direction, left, right, up or down, one letter per square. (I pray you will notice that there are *two* entries that originate in the square numbered 6.)

Letters may be, and often are, *shared* among multiple entries, but no letter may be reused within a single entry. Do *beware*, though, my friends: sometimes *seeming* opportunities for sharing are, in cruel actuality, *traps* to mislead the unwary!

Once you've finished the grid, you can move on to finding the final answer to this Ænigma. Notice that some squares contain smaller shapes. Collect all of the letters appearing within *each* such shape, rearrange them into a single word, and enter it in the corresponding space beneath the grid. Reading out those words, in order, will yield a clue to your final answer.

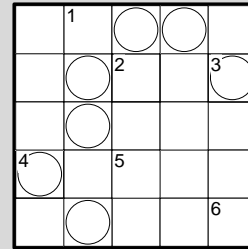

Good luck!

*Adda*
